Step 1

Following are sub-scenarios extracted from the problem scenario:

- Sub-scenario 1: MedRes and customer negotiate, and may agree to exchange medical equipment for certain price. *Commercial transaction* pattern models this scenario.
- Sub-scenario 2: MedRes places an order to MedEq and MedEq ships the equipment to customer. *Commercial transaction* pattern models this scenario.
- Sub-scenario 3: MedEq employs a shipper to ship the order (medical equipment) to the customer. *Outsourcing* pattern models this sub-scenario.
- Sub-scenario 4: MedEq buys replenishment stock from a contract manufacturer at a certain price. *Commercial transaction* pattern models this sub-scenario.
- Sub-scenario 5: The contract manufacturer employs a shipper to ship the order (medical equipment) to MedEq. *Outsourcing* pattern models this sub-scenario.
- Sub-scenario 6: Customer requests a support service and MedRes provides the support service for repairing equipment. *Standing service contract* pattern models this scenario.

Step 2

Following are the roles and the agents adopting those roles for each of the sub-scenarios:

- Sub-scenario 1:

Role	Agent
Company	MedRes
Customer	A customer of MedRes

- Sub-scenario 2:

Role	Agent
Company	MedRes
Customer	A customer of MedEq
EqComp	MedEq

- Sub-scenario 3:

Role	Agent
EqComp	MedEq
Customer	A customer of MedEq
Shipper 1	FedUp, UpFed

- Sub-scenario 4:

Role	Agent
EqComp	MedEq
Manufacturer	FlexMan, SoleMan

- Sub-scenario 5:

Role	Agent
EqComp	MedEq
Manufacturer	FlexMan, SoleMan
Shipper 2	A shipper that the manufacturer employs for shipping the order to MedEq

- Sub-scenario 6:

Role	Agent
Company	MedRes
Customer	A customer of MedRes

Step 3

Following are the business tasks executed by each role:

- Sub-scenario 1:

Role	Task
Company	goodsCust
Customer	payComp

- Sub-scenario 2:

Role	Task
Company	payEq
EqComp	goodsCust

- Sub-scenario 3:

Role	Task
EqComp	goodsCust, payShip1
Customer	
Shipper 1	goodsCust

- Sub-scenario 4:

Role	Task
EqComp	payMfg
Manufacturer	goodsComp

- Sub-scenario 5:

Role	Task
EqComp	
Manufacturer	goodsComp, payShip2
Shipper 2	goodsComp

- Sub-scenario 6:

Role	Task
Company	service
Customer	payService

Step 4

- Sub-scenario 1:

- Sub-scenario 2:

- Sub-scenario 3:

- Sub-scenario 4:

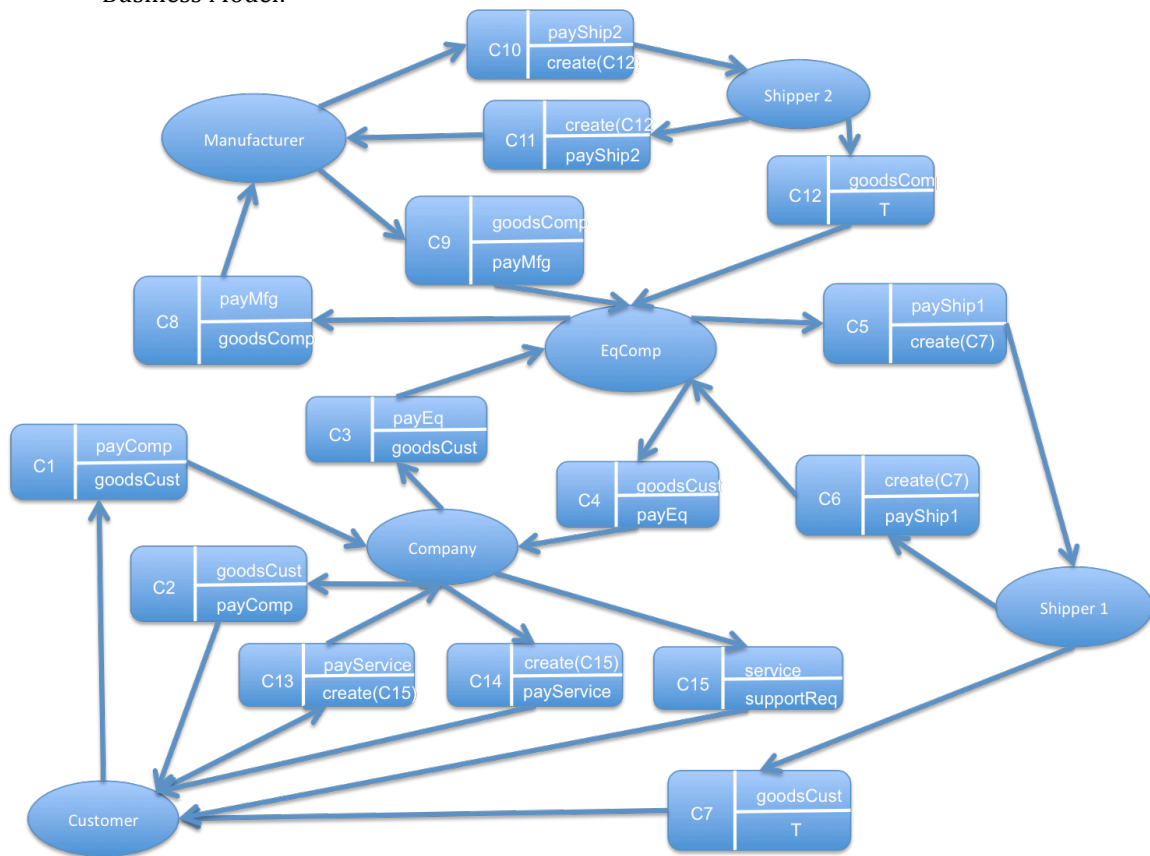

- Sub-scenario 5:

- Sub-scenario 6:

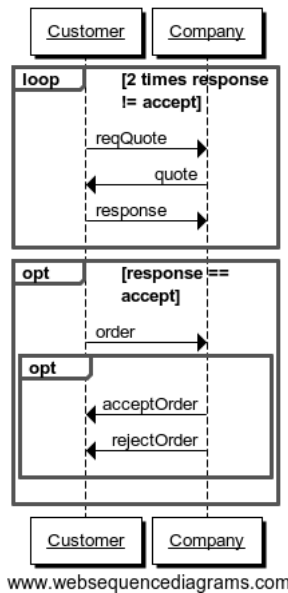

- Business Model:

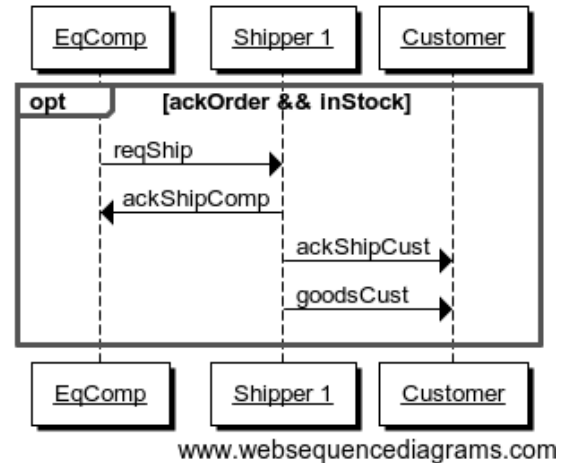

Step 5

- Sequence diagram for sub-scenario 1,2,3:

(order) -> create(C3)
(ackOrder) -> create(C4)

(b) Company places an order to EqComp

(reqShip) -> create(C5)
(ackShipComp) -> create(C6)
(ackShipCust) -> create(C7)

(c) EqComp requests a shipper to ship the goods (order) to the customer if the goods are in stock

(quote) - create(C1)
(acceptOrder) - create(C2)
(a) Customer negotiates with company and places an order

(d) Company pays EqComp for shipping equipment to Customer

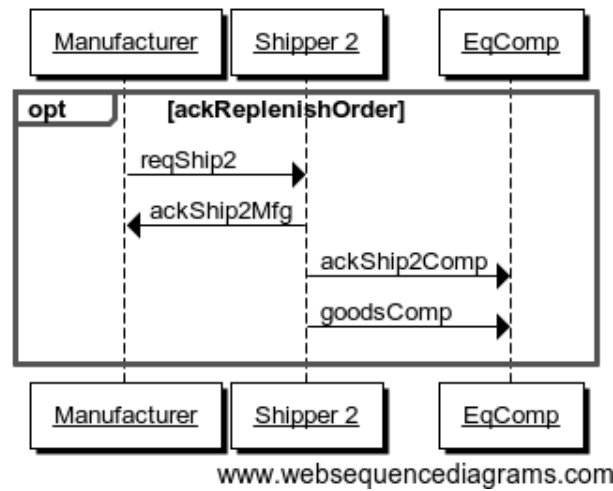

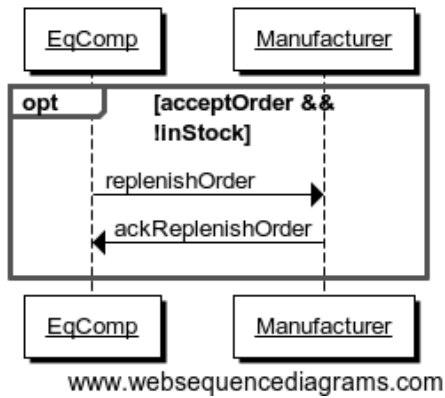

(e) Company pays EqComp for shipping equipment to Customer

(f) Customer pays Company for goods(order)

- Sequence diagram for sub-scenario 4 and 5:

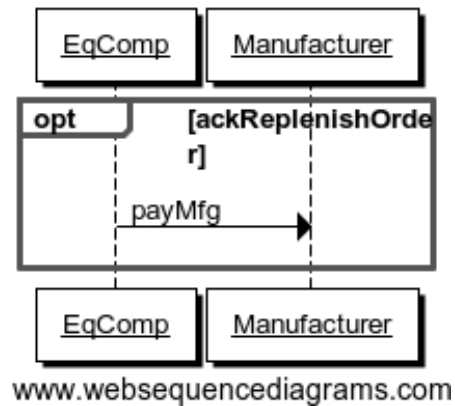

(replenishOrder) -> create(C8)
 (ackReplenishOrder) -> create(C9)

(a) EeqComp places a replenishment order with a Manufacturer

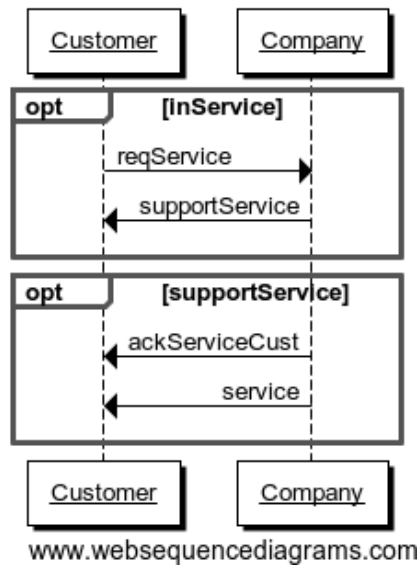

(reqShip2) -> create(C10)
 (ackShipMfg) -> create(C11)
 (ackShip2Comp) -> create(C12)
(b) Manufacturer requests Shipper 2 to ship replenishment order to EeqComp

(b) Manufacturer pays Shipper 2 for shipping replenishment order to EeqComp

- Sequence diagram for sub-scenario 6:

(reqService) -> create(C13)

(ackServiceCust) -> create(C14)

(a) Customer requests repairing service from Company and Company provides service

(b) Customer pays Company for repairing service
